- Here where I learned about linear-gradient and used it in the Nav
- I put small description about the protofilo in the list elemnt
- I linked my git hub acoount in there

Hi welocme to my page

Welcome to my portfolio! Here, you can explore who I am and what I do. This website includes four main sections:

- **CV**, where you can learn about my skills and experience
- **About Me**, page that shares my story and passions
- **Gallery**, showcasing my projects and creative work
- **Contact**, page where you can easily get in touch

Take a look around — this space reflects my journey, growth, and enthusiasm for technology and creativity.

This page took me really long. It is not as creative as my head imagined but still look OK

- I have a nice hoover effect that give a description to my projects
- I also learned how to make an infinte slides

- German

Projects

TRANSCENDENCE | WEBSERVER | INCEPTION | CUB3D

Build my own HTTP web server from scratch in C++, mimicking the behavior of Nginx — but entirely by hand, no external libraries like Boost or libcurl allowed.

C++ | C | Docker
